

**Company:**

Capricor Therapeutics, Inc. (NASDAQ: CAPR) is a cutting-edge biotech company focused on the discovery and development of novel therapies for the treatment of rare diseases. Capricor's lead product candidate, allogeneic Cardiosphere-Derived Cells (CDCs), known as CAP-1002, is being investigated as a treatment for Duchenne muscular dystrophy. In addition, the Company is conducting research and development on its exosomes platform technology for inflammatory indications. Capricor offers exciting opportunities to join our expanding team. Capricor provides competitive compensation and benefits packages.

Position:

Manufacturing Associate I

Description:

This position is immediately available to join our Manufacturing team to support our cGMP manufacturing for clinical trial program(s) and exosome development. Capricor seeks an independent and detail oriented individual with a scientific background, mammalian cell culture and cGMP experience.

Responsibilities:

- Conducting routine production of biologic product(s) including media preparation, cell culture, cell counting, formulation, centrifugation and freezing;
- Independently completing required documentation and proper GMP recording of entries and comments on batch records, forms and protocols;
- Compiling data for documentation of test procedures and reporting abnormalities;
- Making detailed observations, planning and assisting with data collection, data analysis, writing and disseminating production results;
- Maintaining inventory, material transfers and cleanroom-required activities to support GMP operations including, but not limited to, environmental monitoring, equipment cleaning and maintenance;
- Preparing technical summaries, protocols and reports;
- Initiate and close deviations, investigations and CAPAs of moderate complexity;
- Performing special manufacturing and development projects;
- Assist with startup activities of a new manufacturing process collaborating with PD and Quality departments;
- Other duties as assigned.

Requirements:

Bachelor's degree in Biomedical Engineering, Biological Sciences or related field.

Experience and Qualifications:

- Laboratory experience in mammalian tissue culture is required.
- Experience working in a cGMP production environment utilizing aseptic techniques is desired. Preference will be given to candidates with GLP or GMP experience.
- Exceptional communication and interpersonal skills
- Attention to detail

- Excellent organizational skills
- Ability to work in a dynamic environment
- Adaptable/flexible with work schedule due to changes in production
- Ability to multi-task and prioritize work
- Must have demonstrable computer skills in Microsoft Word, Excel, PowerPoint, Project, Access, and JMP, as well as data management and analysis.

Applicants should submit a cover letter and their CV to careers@capricor.com.
